

Profile Summary

Computer Science Engineering student with hands-on experience in logical programming, full-stack web and mobile development, and UI/UX design. Proven track record of contributing to projects and hackathons with strong problem-solving abilities and a collaborative mindset. Proficient in modern programming languages and passionate about leveraging technology to build practical, real-world solutions. Eager to take on challenging roles that demand adaptability, creativity, and effective teamwork.

TECHNICAL SKILLS

Programming Languages:

Python, C++ , Dart,

Frontend:

HTML, CSS, Javascript, React JS, DART, Bootstrap, Tailwind CSS

Backend: PHP, Node JS

Database Management:

SQL, MongoDB, JSON

Graphic Design: Figma, Canva

Version Control: Git

Code Editor/Environment: VS Code, Jupyter

Frameworks: Wordpress, Frameworks

EDUCATION & CERTIFICATIONS

AI ML algorithms In Python (September 2024)

IIT Roorkee, Technocon Workshop, Roorkee

AI ML Remote sensing & geodata analysis

ISRO LMS

LearnWIK Training & Project

Machine Learning in Python & Data Analytics
OpenCV, Matplotlib, Pandas, Scikit, Seaborn

(Undergraduate) Bachelor's in Computer ScienceEngineering (2022 - Present)

Women Institute of Technology, VMSBUTU, Dehradun

K-12 Education (2009 - 2021)

Queen's Valley School, Dwarka, Delhi

Work Experience

Project Development Internship - Intel AI Skills Lab

June 2025 - August 2025

Uttarakhand State Council of Science & Technology (UCOST),
Research Science Center (RSC)

- Developed an AI avatar of Dr. C.V. Raman with real-time voice cloning, lip-sync, and transcription, optimizing APIs and leading performance improvements.

Flutter App Development (Using Dart, JSON, MongoDB)

March 2025 - Aoril 2025

Presented in inter-college Hackathon in VMSBUTU - Pitched as start up project to Founder & Ceo of EDC India

- Developed AgriCycle platform for farm-waste trading with market-price dashboard, alerts, and buying portal; presented at VMSBUTU Hackathon.

Smart India Hackathon

2023 - 2024

- Created a Health Dashboard & OPD Checker featuring Figma workflow design, OPD-queue analysis, and geolocation-driven hospital search.

Financial Dashboard - Data Analysis and predictive AI project

June 2024

- Built a startup financial dashboard featuring Kaggle data analysis, profit-loss trend graphs, monthly budget forecasting, and color-coordinated income/expense charts.

Interest

- Literature & Writing
- Graphic designing
- Public speaking & hosting
